

Living Eggs

The K/1/2 classrooms have been a buzz of excitement with the arrival of ten baby chicks. To complement our unit called "Growing and Changing" we have been able to experience the life cycle of a chicken. The children watched as the eggs in the incubator cracked open from the chicks pecking inside. Then some wet scraggly bodies were exposed. Eventually they turned into little yellow chirping balls of fluff. Just so cute! Now they're getting pin feathers on their wings and growing everyday.

Our babysitting role will come to an end next Tuesday. The chicks are then able to be adopted out to loving homes in pairs or more. They need to be cared for responsibly as they will need warmth for a further 2-6 weeks. A box and a light is satisfactory, providing drafts are excluded. Please see Mrs Koopman on Monday (30/06) if you are interested. The chicks will have to be taken home on Tuesday (01/07) as the brooder box is being collected on this day by 'Living Eggs'.
